4 The Adavinekkalam plant underwent its trial run at the end of December 2024 and the first week of January 2025, subsequently commencing commercial operations. This transition led to increased operational expenses and depreciation, contributing to a negative profit for some of the previous quarters. The management expects the plant to achieve operational breakeven during Q3 of FY 2026-27, based on the anticipated improvement in capacity utilisation, production efficiency, operational optimisation and cost management. Management is of the view that, as the plant stabilises and production levels improve, the operating performance is expected to strengthen and the plant is expected to achieve the projected breakeven.

5 Previous period figures are re-arranged / re-grouped wherever necessary, in line with the current period presentation.
